## Education

**KIET Deemed To Be University** — Murad Nagar, UP
*Bachelor of Technology in Computer Science* — *Aug. 2025 – May 2029*

**K.L. International School** — Meerut, UP
*12th - 90.2%* — *2025*

**K.L. International School** — Meerut, UP
*10th - 95%* — *2023*

## Experience

**Frontend Developer Intern** — April 2025 – June 2025
*Youth Trust Foundation* — *Delhi, India*

- Built responsive CRM dashboard components and user portals using ReactJS, Vite, and Tailwind CSS.
- Translated Figma design prototypes into clean, modular code in collaboration with senior engineering teams.

**Core Team Member** — Sep. 2025 – Present
*AI Skills Lab* — *KIET Deemed To Be University*

- Co-organize technical bootcamps, hackathons, and skill-building workshops for an active student community.
- Mentor participants on practical AI implementation, development tools, and collaborative project execution.

**Campus Ambassador** — Dec. 2025 – Sep. 2026
*PRIR Department* — *KIET Deemed To Be University*

- Coordinate campus outreach initiatives to increase student engagement in academic and extracurricular programs.

**PRIR Coordinator** — Sep. 2026 – Present
*DevUps Club* — *KIET Deemed To Be University*

- Coordinating the PR team as a lead and managing sponsors for the club events and initiatives

## Projects

**Rust Online Shell** | *Rust, Axum, Leptos, Shell/Terminal, OS specific programming*

- End to end Rust based project.
- Rewrote entire Shell logic into Rust then used it as core logic of online terminal.
- Backend logic written using Axum (Rust based backend framework) and Frontend made using Leptos (Rust based web framework).
- Backend was deployed on Render and its frontend was compiled to a WASM file to run in user's browser engine without deploying it separately

**OpsPulse** | *Python, FastAPI, SQLite, React, Laya(SystemOne Model), FastMCP*

- Model Context Protocol (MCP) application built specifically for Laya(new age SystemOne Model)
- This MCP is used for Query routing for a query based api calling architecture.
- OpsPulse implements this query routing into a project obsevability platform.

## Technical Skills

**Languages**: Python, C/C++, Rust, Java, JavaScript, Solidity, SQL
**Full-Stack Web**: Next.js, React, Leptos, Express.js, Node.js, FastAPI, Axum, MongoDB, Tailwind CSS, Vite, Streamlit, Deployment tools
**AI & Tooling**: Retrieval-Augmented Generation (RAG), Langchain, Langgraph, Tensorflow, Python Libraries
**Blockchain & Web3**: Cryptography, Ethereum Blockchain, Solana Blockchain
